

CompTIA A+, Network+, Server +, and Security + Certification

CompTIA, the Computing Technology Industry Association, offers the A+ Certification exams, a testing program that certifies the competency of entry-level (six months experience) service technicians in the computer industry. The A+ Certification exams assess basic computer service and repair technology skills. Reach TMS, an authorized CompTIA curriculum provider, also offers courses to help you prepare for Network+ and Server+ certification exams. The Network+ certification verifies that the candidate knows about the OSI model, network components, and basic networking hardware peripherals

and protocols. The Server+ certification credential validates advanced-level technical competency of server issues and technology, including installation, configuration, upgrading, maintenance, troubleshooting and disaster recovery. The Security+ series helps prepare the learner for the Security+ exam by teaching general security concepts, communication security, infrastructure security, some basics of cryptography, and operational and organizational security. It also provides a practice exam that includes questions in a format similar to the certification exam. Complete certification requirements for A+, Network+, Server+, and Security + are located at the CompTIA Web site at www.comptia.com.

European Computer Driving Licence (ECDL) Certification International Computer Driving Licence (ICDL) Certification¹

The ECDL Foundation awards ECDL or ICDL certification to those who have passed one theoretical test on basic Information Technology concepts and six practice-based tests using a personal computer and common computer applications. To prepare for these tests,

an individual may take courses from Reach TMS, a certified ECDL and ICDL vendor. Being a certified ECDL/ICDL vendor means that Reach Online courseware has been approved by the ECDL foundation and meets the criteria of version 3.0 and version 4.0 of the ECDL syllabus. Full certification requirements are located at the ECDL Foundation Web site at www.ecdl.com

¹ Presentation of the ECDL/ICDL logos signify that the courseware material distributed through this Web site has been developed by MindLeaders and has received the approval of the ECDL Foundation Ltd. and interim localization approval from ICDL Canada Ltd.

IBM DB2 Universal Database

Reach Online new DB2 Universal Database series provides a practical approach to learning how to use DB2 Universal Database and helps prepare learners for the DB2 Certification Exam (Exam 700). Learners will explore how to use various applications to access DB2 data and how to use tools to administer the database. The IBM DB2 UDB Test 700 covers accessing data, working with DB2 UDB data and objects, data concurrency, and database planning and security. For more information about the exam, visit www-03.ibm.com/certify/.
